

In a similar vein, the Chum King [(866) 248-6546; www.chum-king.com] is a perforated plastic or metal container that can be filled with chum and lowered to any depth, where it releases oil and bait bits. It's great for bottom fishing, and can also be slow-trolled at different depths. The container even has a release clip that allows the whole load of chum to be released at once, creating a chum explosion.
