

Chumming Attractions

The Chum-King is scientifically designed to sink rapidly to the depth you desire. It can be filled with your choice or frozen chum, cut bait, live bait or anything the angler desires. Once under water, the Chum-King can remain closed or you can open it on command to release your larger pieces of bait. The patented release action gives you the added advantage to create a feeding frenzy. The Chum-King is also easily cleaned and made of durable ABS plastic. Go out there and catch those big ones!
